

All Altamonte Pediatric Associates' physicians are Board Certified fellows of the American Academy of Pediatrics. Our standard is to follow the guidelines as stated by the AAP regarding administration of vaccines, scheduling of well child exams and other recommendations concerning the wellbeing of your child. Families who choose not to comply with the recommended vaccine and well visit schedule will be asked to find another medical practice that is more in line with their philosophy of child care. Please do not hesitate to speak with us if you need more information.
